

Florida HIV/AIDS Comprehensive Planning Network Member Nomination Procedure

To expedite nominations submitted by local partnerships for recommendation to an FCPN position, it is requested that all of the required information be submitted together.

To nominate an individual for a position, the following documentation is required unless specified otherwise:

1. A letter of nomination from the partnership, planning body or consortia (for the Prevention representative), consortia or planning council for combined areas (for the Patient Care representative) or CHD director or his/her designee (for the Department of Health representative).
2. A copy of the nominee's resume (requested, but not required)
3. A completed FCPN Nominee form

Please feel free to make as many copies of this material as needed.

HIV/AIDS affects a cross-section of Florida's population. The Prevention Planning Group (PPG) aims for parity, inclusion, and representation (PIR). Planning is more likely to be effective if representation is culturally appropriate in regards to the demographics of the HIV/AIDS epidemic. HIV/AIDS disproportionately affects men who have sex with men (MSM), especially the young and minorities, and the extent of this disproportion will vary by area. Please keep this in mind as your local area moves through the nomination process. Selection takes in consideration experience as well as representation of the epidemic.

Upon completion of the required information, please forward all of the information to:
